Live Web Casting

To broadcast an event in real time to your selected audience over the internet. This can range from a simple webcam broadcast to a major music or sporting event. This can be used for business broadcasts of presentations and conferences as well as educational and personal events such as online training and weddings.

K7 Institute of Management

Vbiz Solutions has designed a wonderful website for K7 Institute of Management, Ahmedabad, where in their team has given us an excellent facility of online leads generation. Students or inquiry can directly put a query on website and we receive direct email with all details. Thus we can further do follow ups and get our enrollments done. I am very much impressed with such facility given by the web team in our website and since a year we have had very much positive response from inquiries. We wish them all the best in the future.
